NUC7i5BNK

Who said small isn't powerful?

Get ready for truly responsive performance. The newest members of the Intel® NUC family are built with a dual-core 7th generation Intel® Core™ i5 processor. The Intel NUC Kits NUC7i5BNH and NUC7i5BNK give you the performance to turn the Intel NUC into a powerhouse of productivity and play, running analytics and working late into the night, or streaming your favorite movies and music to unwind at the end of your day.

The slightly taller Intel NUC7i5BNH is Intel® Optane™ Memory ready which makes you ready for the future. By easily installing and pairing Intel Optane Memory with high capacity HDD storage media, you get amazing performance and responsiveness as well as shorter boot times, faster application launches, and more responsive browsing. Intel NUC7i5BNH has room for a 2 TB HDD, so you have the room to store and back up all your important files. The slimmer Intel NUC7i5BNK comes with an M.2 slot for a lightning fast SSD.

New features let you use Windows® 10 to its full potential

Both the Intel NUC7i5BNH and NUC7i5BNK have some cool new features including dual-array front microphones so you can take advantage of Cortana's* capabilities if you install Windows® 10 with no additional hardware needed. There's also a front power button and a multi-color LED ring so you can personalize the NUC with the look you want, along with 7.1 surround sound via the HDMI* port so that you can be deeply immersed. Or listen with headphones via the front microphone/audio jack. The choice is yours.

With four USB 3.0 ports, including a charging port, you can connect a USB keyboard, mouse, and printer, and still have room to charge your phone or connect external storage.

Intel® Iris™ Plus Graphics and Thunderbolt™ 3

Intel® Iris™ Plus Graphics lets you see images in brilliant 4K and adds better clarity, letting you see data visualizations or on screen text in brilliant definition. The Intel NUC7i5BNH and NUC7i5BNK can connect up to three 4K monitors so you can spread your work out across screens. The kits also come with Thunderbolt™ 3 which supports up to 40 Gbps transfer speeds for your intensive data needs and has built-in 10 GbE for networking with another Thunderbolt 3 system.

Cut the cords, not the performance

Both systems come with Intel® 802.11ac wireless, Intel's fastest wireless available today, for connectivity right out-of-the-box. This makes it simple to immediately access files in the cloud, and with built-in Bluetooth* 4.2, you can connect wireless peripherals like headsets and keyboards.

INTEL® NUC: Go small, get big.
